Compact 50

\$17K

HACO Kingsland Hydraulic Ironworker

- Mechanical backgauge
- Gauging tables for punch, shear and notcher
- Shielded Electric foot pedal
- One shot lubrication

Well-engineered, robust steelworkers, built for a long working life

Shielded foot control

The inch mode on each workstation enables the correct work piece positioning and tool alignment. Limit switches allow accurate adjustment of the stroke length for maximum efficiency. Stroke with automatic return.

Angle cutting

Angle iron can be cut on every angle from 45° up to 90°, both internal and external, without any adaptations to the machine. Flanges from larger angle iron can be miter cut with the shear.

NS-HG

\$493K

High Level Power Fiber Laser Tube Cutting Machine

A meticulously engineered solution designed to deliver precision, efficiency, and high performance for industrial cutting applications. Powered by advanced fiber laser technology, this machine offers exceptional cutting capabilities, handling materials with thicknesses of up to 50 millimeters effortlessly. Operational flexibility is backed by a frequency speed control system, allowing precise adjustments based on specific cutting requirements.

Dimensions

16000 mm 3500mm and 2300 mm, ensuring stability during operation

Weight

20,000 kg, dampening vibration

Voltage Range

220-440 volts, ensuring compatibility with diverse industrial power setups.

TS 6 X 1/4

\$40K

Hydraulic Shear

SP9 Control

The TS shears remain the pacesetters in the price/quality ratio market of today. With thousands of units running day after day all over the world, we are convinced of the durability and craftsmanship of these machines. All our TS shears are equipped with power rake angle adjustment from the SP9 control panel and quick blade gap adjustment.

- **Blade gap** Quick manual blade gap setting with SP9
- **Backgauge** 2 rigids arms, assuring a precise positioning of the sheet
- **2 under driven cylinders**
- **Squaring arm** of 1000 mm with scale, T-slot and tilling stop

EuroMaster-S 110 10 8

\$138K

Hydraulic Press Brake

- FastBend
- Quick Manual USA
- Increased Open Height
- 5 Axis Backgauge
- Lazersafe Safety Curtain

The EuroMaster-S is HACO's premium press brake for frequent use. It supports the most extensive range of options — from standard to advanced customizations — tailored to meet the most demanding requirements. Fully made in Europe using top-quality components.

- **Control:** FastBEND-2D MT Premium control
- **High daylight opening** (520 - 620 mm), Stroke (270-420mm) and Gap (400mm)
- **Backgauge** High Speed X-R Backgauge for accurate sheet positioning
- **ES connectors** with 150mm height and 120 mm Heavy Duty (HD)
- **Manual Anti Deflection Table (Crowning)** for ES dies, including nute for clamping single-V dies
- **2 Sheet Supports** 750 mm with guiding, manually adjustable in height
- **Lazersafe** Optical safety guards
- **LED illumination of the bending area**
