

HACO PRESS RELEASE – August 11, 2025:

HACO Launches OptiForm – A New Generation Press Brake

Designed for Today's Fabricators. Backed by 60 Years of Expertise.

HACO proudly presents the **OptiForm** – a new-generation press brake designed to meet the real-world demands of today's metal fabricators.

Backed by 60 years of engineering expertise, **OptiForm** combines smart design with competitive pricing for a solution that's both robust and cost-effective.

*"The OptiForm is a smart, future-ready solution for fabricators who want to modernise without overinvesting," said **Angelo Steen, Business Unit Director, HACO Sheet Metal**. "We've combined the trusted simplicity of our SynchroMaster with a fresh design and intuitive control, making it an ideal choice for manufacturers across the globe who value flexibility, reliability, and performance."*

Two Sizes, Two Versions – One Mission: Efficiency

Available in two capacities:

- **30150** – 3 meters, 150 tons
- **40250** – 4 meters, 250 tons

And in two preconfigured versions:

- **Basic** – Manual crowning table and 2-axis backgauge
- **+ Version** – Motorized crowning and 4-axis backgauge for higher precision and flexibility

Designed for Fabricators. Optimized by Engineers.

The **OptiForm** was completely reimaged by HACO's R&D team to simplify production, enhance usability, and ensure top-notch results.

Every component was scrutinized and optimized – down to the last detail.

This streamlined product strategy enables HACO to manufacture in series, ensuring lower costs, fast delivery from stock, and consistent quality – ideal for fabricators who value productivity without complexity.

Made in Europe. Made to Perform.

Manufactured entirely in Europe, the **OptiForm** stands out with its compact footprint and rigid frame, intuitive graphical CNC, and compatibility with ES tooling for fast, easy tool changes and maximum versatility.

Compact by design. Solid by nature.

A Strong Start

First introduced to HACO sales teams in May 2025, **OptiForm** received enthusiastic feedback across the globe.

Its official market launch is scheduled for **September 2025**, and early market response points to a strong international rollout.

About HACO Group

HACO Group is a global leader in the design and manufacture of high-quality sheet metalworking machinery. With over 60 years of expertise and a commitment to innovation, HACO provides a comprehensive range of products, including press brakes, shears, punches, and laser cutting systems, tailored to meet the needs of modern sheet metal fabricators.

Driven by a passion for precision and reliability, HACO combines advanced technology with proven craftsmanship to deliver durable, efficient, and user-friendly solutions. Our global network of production facilities, sales offices, and service centers ensures close customer support and rapid response worldwide.

At HACO, we continuously invest in research and development to bring cutting-edge solutions to the market, helping customers improve productivity and stay competitive in a rapidly evolving industry.
